Founding Dev

Project Name

Used to identify your Project on the Dashboard, Vercel CLI, and in the URL of your Deployments.

vercel.com/...ng-creative-projects/ akc

Learn more about Project Name

Save

Avatar

This is your project's avatar. Click it or drop an image to upload.

An avatar is optional but recommended.

Project ID

Used when interacting with the Vercel API.

`prj_BjuWeFRUC18j9j37A6aT8wHfzFFx`

Learn more about Project ID

Vercel Toolbar

Enable the Vercel Toolbar on your Deployments.

Pre-Production Deployments: Default (controlled at the team level)

Production Deployments: Default (controlled at the team level)

To use the toolbar in production your team members need the Chrome extension or to enable the toolbar for that domain in the toolbar menu. Learn more about using the toolbar in production.

Preview Deployment Suffix

By default, the URL of every new Preview Deployment ends with `.vercel.app`. This setting allows you to choose your own custom domain in place of this suffix. This takes precedence over the team-level preview deployment suffix.

my-deployment. vercel.app

This feature is available for **$100 per month**.

Enable and Pay

Data Preferences

Vercel may train on and share code and chat data with AI model providers for training purposes only. If you turn this off, we will not share data going forward for this project.

Improve models with this project's data

Disabled globally at Team level. To manage, open Team settings

Transfer

Transfer your project to another team without downtime or workflow interruptions.

Learn more about Transferring Projects

Transfer

Pause Project

Temporarily stop serving your Production Deployment so the project stops using metered resources. You can resume it at any time.

Preview Deployments, settings, and data are unaffected. Learn more about pausing projects

Pause Project

Delete Project

Permanently delete this project and all deployments, domains, environment variables, serverless functions, and settings.
