Get Started
To start collecting performance metrics, follow these steps.
Next.js
1 Install our package
Start by installing @vercel/speed-insights in your existing project.
npm
yarn
pnpm
npm i @vercel/speed-insights
2 Add the Next.js component
Import and use the <SpeedInsights/> Next.js component into your app's layout or your main file.
import { SpeedInsights } from "@vercel/speed-insights/ne
For full examples and further reference, please refer to our documentation
3 Deploy & Visit your Site
Deploy your changes and visit the deployment to collect your first events.
If you don't see data after 30 seconds, check for content blockers and try to navigate between pages on your site.
Or, install automatically with Vercel Agent (free).
Implement with Vercel Agent
Automatically generate a pull request with Speed Insights configured for your project — at no charge.
