Badge

A label that emphasizes an element that requires attention, or helps categorize with other similar elements.

Variants

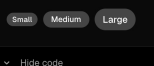

Hide code

```tsx
import { Badge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-col gap-2">
      <div className="flex items-center gap-1">
        <Badge variant="gray">gray</Badge>
        <Badge variant="gray" contrast="low">
          gray-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="blue">blue</Badge>
        <Badge variant="blue" contrast="low">
          blue-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="purple">purple</Badge>
        <Badge variant="purple" contrast="low">
          purple-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="amber">amber</Badge>
        <Badge variant="amber" contrast="low">
          amber-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="red">red</Badge>
        <Badge variant="red" contrast="low">
          red-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="pink">pink</Badge>
        <Badge variant="pink" contrast="low">
          pink-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="green">green</Badge>
        <Badge variant="green" contrast="low">
          green-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="teal">teal</Badge>
        <Badge variant="teal" contrast="low">
          teal-subtle
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge variant="inverted">inverted</Badge>
        <Badge variant="trial">Trial</Badge>
        <Badge variant="turbo">Turborepo</Badge>
      </div>
    </div>
  );
}
```

Sizes

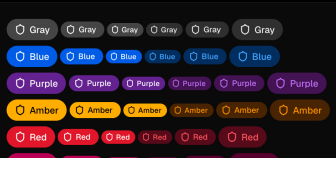

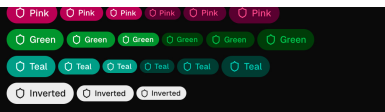

Hide code

```tsx
import { Badge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex items-center gap-2">
      <Badge size="sm">Small</Badge>
      <Badge size="md">Medium</Badge>
      <Badge size="lg">Large</Badge>
    </div>
  );
}
```

With icons

Hide code

```tsx
import { Badge } from '@vercel/geistcn/components';
import type { JSX } from 'react';
import { IconShield } from '@vercel/geistcn-assets/icons';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-col gap-2">
      <div className="flex items-center gap-1">
        <Badge icon={<IconShield />} size="lg" variant="gray">
          gray
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="gray">
          gray
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="gray">
          gray
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="gray" contrast="low">
          gray
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="gray" contrast="low">
          gray
        </Badge>
        <Badge icon={<IconShield />} size="lg" variant="gray" contrast="low">
          gray
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge icon={<IconShield />} size="lg" variant="blue">
          blue
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="blue">
          blue
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="blue">
          blue
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="blue" contrast="low">
          blue
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="blue" contrast="low">
          blue
        </Badge>
        <Badge icon={<IconShield />} size="lg" variant="blue" contrast="low">
          blue
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge icon={<IconShield />} size="lg" variant="purple">
          purple
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="purple">
          purple
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="purple">
          purple
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="purple" contrast="low">
          purple
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="purple" contrast="low">
          purple
        </Badge>
        <Badge icon={<IconShield />} size="lg" variant="purple" contrast="low">
          purple
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge icon={<IconShield />} size="lg" variant="amber">
          amber
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="amber">
          amber
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="amber">
          amber
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="amber" contrast="low">
          amber
        </Badge>

        <Badge icon={<IconShield />} size="sm" variant="pink">
          pink
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="pink" contrast="low">
          pink
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="pink" contrast="low">
          pink
        </Badge>
        <Badge icon={<IconShield />} size="lg" variant="pink" contrast="low">
          pink
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge icon={<IconShield />} size="lg" variant="green">
          green
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="green">
          green
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="green">
          green
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="green" contrast="low">
```

```
          green
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="green" contrast="low">
          green
        </Badge>
        <Badge icon={<IconShield />} size="lg" variant="green" contrast="low">
          green
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge icon={<IconShield />} size="lg" variant="teal">
          teal
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="teal">
          teal
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="teal">
          teal
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="teal" contrast="low">
          teal
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="teal" contrast="low">
          teal
        </Badge>
        <Badge icon={<IconShield />} size="lg" variant="teal" contrast="low">
          teal
        </Badge>
      </div>
      <div className="flex items-center gap-1">
        <Badge icon={<IconShield />} size="lg" variant="inverted">
          inverted
        </Badge>
        <Badge icon={<IconShield />} size="md" variant="inverted">
          inverted
        </Badge>
        <Badge icon={<IconShield />} size="sm" variant="inverted">
          inverted
        </Badge>
      </div>
    </div>
  );
}
```

Pill

A special link, not quite as prominent as a button, based on `<Badge />` styling.

Hide code

```
import { badgeVariants } from '@vercel/geistcn/components';
import { LogoIconSlack } from '@vercel/geistcn-assets/logos';
import { cn } from '@vercel/geistcn/utils';
import { Link } from '@vercel/microfrontends/next/client';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-col gap-4">
      <div className="flex items-center gap-2">
        <Link
          href="#badge#pill"
          className={cn(badgeVariants({ variant: 'pill', size: 'sm' }))}
        >
          Label
        </Link>
        <Link
          href="#badge#pill"
          className={cn(badgeVariants({ variant: 'pill', size: 'md' }))}
        >
          Label
        </Link>
        <Link
          href="#badge#pill"
          className={cn(badgeVariants({ variant: 'pill', size: 'lg' }))}
        >
          Label
        </Link>
      </div>
      <div className="flex items-center gap-2">
        <Link
          href="#badge#pill"
          className={cn(badgeVariants({ variant: 'pill', size: 'sm' }))}
        >
          <LogoIconSlack colored data-slot="icon" />
          Label
        </Link>
        <Link
          href="#badge#pill"
          className={cn(badgeVariants({ variant: 'pill', size: 'md' }))}
        >
          <LogoIconSlack colored data-slot="icon" />
          Label
        </Link>
        <Link
          href="#badge#pill"
          className={cn(badgeVariants({ variant: 'pill', size: 'lg' }))}
        >
          <LogoIconSlack colored data-slot="icon" />
          Label
        </Link>
      </div>
    </div>
  );
}
```

Best Practices

- Use Badge for short, scannable metadata that sits next to the thing it describes: status, plan tier, environment, or role. One badge per row; two side by side is a sign the row needs a second column.
- For a colored dot without text, use **Status Dot**. For clickable filter chips that toggle a query, use the `pill` variant or a small **Button**.
- Badges are static labels. Don't wire `onClick` onto them; promote to a Button or link if the user can act on the value.
- Keep badge content to text or `icon` + text. Never stack two icons or a child Badge inside a Badge.
- Pair lifecycle badges (`Alpha`, `Beta`, `Early Access`) with a **Tooltip** that names the limit, like `Alpha: API may change before GA`.
- Title Case, one word when possible, two max: `Active`, `Pending`, `Pro`, `Enterprise Trial`. Match the canonical API or log term: `Production` not `Prod`, `Deployed` not `Live`, `Canceled` not `Cancelled` (the Vercel API uses one L).
- Don't add a checkmark icon for success states or an X for errors; the variant carries that signal. Map meaning to color: `green` for healthy, `red` for error, `amber` for warning, `blue` for informational or production, `gray` for neutral. The `-subtle` suffix tones any of them down on dense surfaces.

- Skip stuffing sentences inside (`Currently Active`, `You are on Pro`); the surrounding row supplies the context.
- Set `title` for icon-only or ambiguous badges so screen readers announce the meaning. Don't rely on color alone; the text has to be readable without it.
