Geist Sans Geist Serif Geist Mono Geist Pixel

At Vercel, we've developed Geist, a typeface specifically designed for **developers** and **designers**. We began by creating a monospace version that prioritized readability and seamlessly integrated into coding environments.

After perfecting the **monospace variant**, we expanded Geist into a Sans, Serif, and Pixel version, adding versatility to its capabilities.

Geist embodies our **design principles** of simplicity, minimalism, and speed, drawing inspiration from the renowned **Swiss design movement**.

With precision, clarity, and functionality at its core, Geist **enhances** the visual experience of developers and designers, empowering them to effectively communicate their ideas.

Geist truly represents the coding and design spirit within Vercel's creative community.

Geist Font Sans/Mono

This font embodies our design principles of simplicity, minimalism, and speed, drawing inspiration from the renowned Swiss design movement.

Heading		72	For hero areas on marketing areas.
Heading		48	For hero areas on mobile marketing pages.
Heading		32	Subsections of a dashboard tab.
Heading		20	Typically used on mobile when sizing down a step from 32px.
Heading		16	Typically used on mobile when sizing down a step from 24px.
Copy		20	For hero areas on marketing pages.
Copy		18	Mainly for marketing, big quotes.
Copy		16	Simpler, larger views like Modals where text can breathe.
Copy		14	Most commonly used text style.
Copy		13	For secondary text and views where space is a premium.
Copy	mono	13	Used for inline code mentions.
Label		20	For hero areas on marketing pages.
Label		18	Only used in the Gauge (Medium) so far.
Label		16	Used in titles to help differentiate from regular copy.
Label		14	Most common text styles of all. Used in many menus.
Label		13	Secondary line. Tabular is used when conveying numbers.
Label		12	Tertiary level text in busy views.
Label		11	Used in the smallest Badge. Strong so it stands out at that size.
Label	strong	14	Largest form of mono, to pair with larger (>14) text.
Label	mono	13	To pair with Label 14.
Label	mono	12	Smaller alternative, mainly for documenting this library.
Button	mono	16	Used in the Largest button types.
Button		14	Typical button text.
Button		12	Only used when a tiny button is placed inside an input field.

How to install

Install via NPM (Recommended)

Best for Next.js projects. Includes full glyph set and `font-feature-settings` support.

```
▲ ~ npm i geist
```

Get the latest Node.js and npm.

Use with Next.js

```
import { GeistSans } from 'geist/font/sans';
import { GeistMono } from 'geist/font/mono';
import { GeistPixel } from 'geist/font/pixel/variable';
import { GeistPixelSquare, GeistPixelGrid, GeistPixelCircle, GeistPixel
import { GeistSerif, GeistSerifRegular, GeistSerifSquare, GeistSerifTri
```

You can also load Geist Serif and Geist Pixel as variable fonts and choose a style with the ELSH axis.

Include this code in `app/layout.js`. View the README for full instructions.

Features by installation method

Use from Google Fonts
