Gauge

A circular visual for conveying a percentage.

Default

Hide code

```tsx
import { Gauge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-row items-stretch justify-start gap-8 flex-initial">
      <Gauge size="tiny" value={50} />
      <Gauge size="small" value={50} />
      <Gauge size="medium" value={50} />
      <Gauge size="large" value={50} />
    </div>
  );
}
```

Label

Hide code

```tsx
import { Gauge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-row items-stretch justify-start gap-8 flex-initial">
      <Gauge showValue size="tiny" value={80} />
      <Gauge showValue size="small" value={80} />
      <Gauge showValue size="small" value={100} />
      <Gauge showValue size="medium" value={80} />
      <Gauge showValue size="medium" value={100} />
      <Gauge showValue size="large" value={80} />
      <Gauge showValue size="large" value={100} />
    </div>
  );
}
```

Default color scale

Hide code

```tsx
import { Gauge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-row items-stretch justify-start gap-8 flex-initial">
      <Gauge size="small" value={14} />
      <Gauge size="small" value={34} />
      <Gauge size="small" value={68} />
    </div>
  );
}
```

Custom color range

Hide code

```tsx
import { Gauge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-row items-stretch justify-start gap-2 flex-initial">
      <Gauge
        colors={{
          '0': 'var(--ds-pink-100)',
          '10': 'var(--ds-pink-200)',
          '20': 'var(--ds-pink-300)',
          '30': 'var(--ds-pink-400)',
          '50': 'var(--ds-pink-500)',
          '60': 'var(--ds-pink-600)',
          '70': 'var(--ds-pink-700)',
          '80': 'var(--ds-pink-800)',
          '90': 'var(--ds-pink-900)',
          '100': 'var(--ds-pink-1000)',
        }}
        size="small"
        value={0}
      />
      <Gauge
        colors={{
          '0': 'var(--ds-pink-100)',
          '10': 'var(--ds-pink-200)',
```

```
          '20': 'var(--ds-pink-300)',
          '30': 'var(--ds-pink-400)',
          '50': 'var(--ds-pink-500)',
          '60': 'var(--ds-pink-600)',
          '70': 'var(--ds-pink-700)',
          '80': 'var(--ds-pink-800)',
          '90': 'var(--ds-pink-900)',
          '100': 'var(--ds-pink-1000)',
        }}
        size="small"
        value={10}
      />
      <Gauge
        colors={{

          '60': 'var(--ds-pink-600)',
          '70': 'var(--ds-pink-700)',
          '80': 'var(--ds-pink-800)',
          '90': 'var(--ds-pink-900)',
          '100': 'var(--ds-pink-1000)',
        }}
        size="small"
        value={60}
      />
      <Gauge
        colors={{
          '0': 'var(--ds-pink-100)',
          '10': 'var(--ds-pink-200)',
          '20': 'var(--ds-pink-300)',
          '30': 'var(--ds-pink-400)',
          '50': 'var(--ds-pink-500)',
          '60': 'var(--ds-pink-600)',
          '70': 'var(--ds-pink-700)',
          '80': 'var(--ds-pink-800)',
          '90': 'var(--ds-pink-900)',
          '100': 'var(--ds-pink-1000)',
        }}
        size="small"
        value={70}
      />
      <Gauge
        colors={{
          '0': 'var(--ds-pink-100)',
          '10': 'var(--ds-pink-200)',
          '20': 'var(--ds-pink-300)',
          '30': 'var(--ds-pink-400)',
          '50': 'var(--ds-pink-500)',
          '60': 'var(--ds-pink-600)',
          '70': 'var(--ds-pink-700)',
          '80': 'var(--ds-pink-800)',
          '90': 'var(--ds-pink-900)',
          '100': 'var(--ds-pink-1000)',
        }}
        size="small"
        value={80}
      />
      <Gauge
        colors={{
          '0': 'var(--ds-pink-100)',
          '10': 'var(--ds-pink-200)',
          '20': 'var(--ds-pink-300)',
          '30': 'var(--ds-pink-400)',
          '50': 'var(--ds-pink-500)',
          '60': 'var(--ds-pink-600)',
          '70': 'var(--ds-pink-700)',
          '80': 'var(--ds-pink-800)',
          '90': 'var(--ds-pink-900)',
          '100': 'var(--ds-pink-1000)',
        }}
        size="small"
        value={90}
      />
      <Gauge
        colors={{
          '0': 'var(--ds-pink-100)',
          '10': 'var(--ds-pink-200)',
          '20': 'var(--ds-pink-300)',
          '30': 'var(--ds-pink-400)',
          '50': 'var(--ds-pink-500)',
          '60': 'var(--ds-pink-600)',
          '70': 'var(--ds-pink-700)',
```

```
          '80': 'var(--ds-pink-800)',
          '90': 'var(--ds-pink-900)',
          '100': 'var(--ds-pink-1000)',
        }}
        size="small"
        value={100}
      />
    </div>
  );
}
```

Custom secondary color

Hide code

```
import { Gauge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex justify-start">
      <Gauge
        colors={{
          primary: 'var(--ds-blue-700)',
          secondary: 'var(--ds-blue-300)',
        }}
        size="medium"
        value={50}
      />
    </div>
  );
}
```

Arc priority

When using the gauge to display a ratio, use the `equal` arc priority to make both arcs are equally sized.

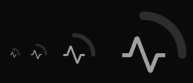

Hide code

```
import { Gauge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-row items-stretch justify-start gap-2 flex-initial">
      <Gauge
        arcPriority="equal"
        colors={{
          primary: 'var(--ds-blue-700)',
          secondary: 'var(--ds-red-700)',
        }}
        showValue
        size="medium"
        value={50}
      />
    </div>
  );
}
```

Indeterminate

Hide code

```
import { Gauge } from '@vercel/geistcn/components';
import type { JSX } from 'react';

export function Component(): JSX.Element {
  return (
    <div className="flex flex-row items-stretch justify-start gap-2 flex-initial">
      <Gauge indeterminate size="tiny" value={25} />
      <Gauge indeterminate size="small" value={25} />
      <Gauge indeterminate size="medium" value={25} />
      <Gauge indeterminate size="large" value={25} />
    </div>
  );
}
```

Best Practices

When to use

- A 0–100 ratio against a fixed maximum where the comparison is the point, like quota usage, build cache hit rate, uptime, or billing-period consumption.
- For determinate task progress with a known total (uploads, multi-step setup), use **Progress**.
- For binary or enumerated state, use **Status Dot** for deployments or **Badge** for everything else.

Behavior

- Use `arc="equal"` for true ratios so 50% reads as exactly half. Use the default `primary` arc for single-percentage usage where the filled portion is the story.
- Threshold colors should match the same numeric breakpoints used elsewhere in the product (`>=80%` warning, `>=95%` error). Don't invent gauge-only thresholds.
- Pair `indeterminate` with explanatory copy nearby (`Calculating usage…`) so the user knows the value is loading, not zero.

Content

- Always pair the gauge with an adjacent label or **Tooltip** naming what the number represents (`Build Cache Hit Rate`). The gauge alone is not self-describing.
- Don't put units inside `children`; the label carries the unit (`Uptime · 99.97%`). `children` is reserved for an icon overlay.
- When `showValue` is on, the rendered number is the value only. Never inject a `%` or unit string into the prop.

Accessibility

- The component sets `role="progressbar"` with `aria-valuemin`, `aria-valuemax`, and `aria-valuenow`. Don't override those.
- The adjacent label is the gauge's accessible name. Tie it with `aria-labelledby` on the gauge wrapper so screen readers read "Uptime, 99 percent."
- Don't use color to encode the threshold without redundant text; pair the warning tint with copy below or in the Tooltip.
