Typography

Rules of typesetting throughout the system.

Usage

Our typography styles can be consumed as Tailwind classes. The classes below pre-set a combination of `font-size`, `line-height`, `letter-spacing`, and `font-weight` for you based on the Geist Core Figma system.

To make use of the **Subtle** and **Strong** modifiers, all you have to do is use the `<strong>` element nested as the descendant of a given typography class:

```
<p className="text-copy-16">
  Copy 16 <strong>with Strong</strong>
</p>
```

Headings

Used to introduce pages or sections.

Aa Example	Class name	Usage
Heading 72	`text-heading-72`	—
Heading 64	`text-heading-64`	—
Heading 56	`text-heading-56`	—
Heading 48	`text-heading-48`	—
Heading 40	`text-heading-40`	—
Heading 32 with Subtle	`text-heading-32`	—
Heading 24 with Subtle	`text-heading-24`	—
Heading 20 with Subtle	`text-heading-20`	—
Heading 16 with Subtle	`text-heading-16`	—
Heading 14	`text-heading-14`	—

Buttons

Only to be used within components that render buttons.

Aa Example	Class name	Usage
Button 16	`text-button-16`	Largest button.
Button 14	`text-button-14`	Default button.
Button 12	`text-button-12`	Only used when a tiny button is placed inside an input field.

Label

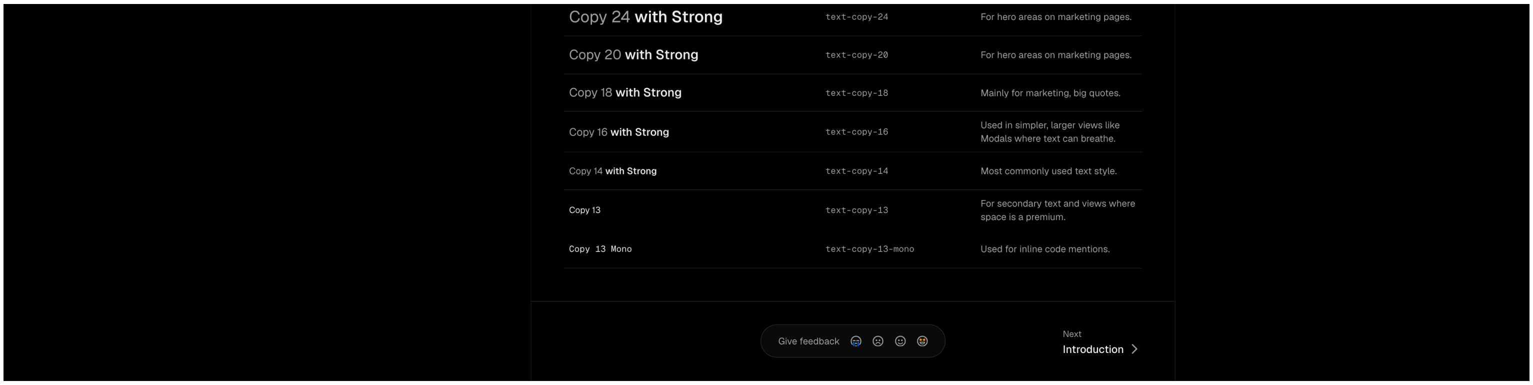
Designed for single-lines, and given ample line-height for highlighting & marrying up with icons.

Aa Example	Class name	Usage
Label 20	`text-label-20`	—
Label 18	`text-label-18`	—
Label 16 **with Strong**	`text-label-16`	Used in titles to help differentiate from regular
Label 14 **with Strong**	`text-label-14`	Most common text style of all. Used in many menus.
`Label 14 Mono`	`text-label-14-mono`	Largest form of mono, to pair with larger (>14) text.
Label 13 **with Strong, and Tabular (123)**	`text-label-13`	Used as a secondary line next to other labels. Tabular is used when conveying numbers for consistent spacing.
`Label 13 Mono`	`text-label-13-mono`	Used to pair with Label 14, as the smaller mono size looks better in that pairing.
Label 12 **with Strong**, AND CAPS	`text-label-12`	Used for tertiary level text in busy views, like Comments, Show More and the capitals in Calendars.
`Label 12 Mono`	`text-label-12-mono`	—

Copy

Designed for multiple lines of text, having a higher line height than Label.

Aa Example	Class name	Usage



Copy 24 **with Strong**	`text-copy-24`	For hero areas on marketing pages.
Copy 20 **with Strong**	`text-copy-20`	For hero areas on marketing pages.
Copy 18 **with Strong**	`text-copy-18`	Mainly for marketing, big quotes.
Copy 16 **with Strong**	`text-copy-16`	Used in simpler, larger views like Modals where text can breathe.
Copy 14 **with Strong**	`text-copy-14`	Most commonly used text style.
Copy 13	`text-copy-13`	For secondary text and views where space is a premium.
`Copy 13 Mono`	`text-copy-13-mono`	Used for inline code mentions.
