Vercel Connect for AI apps and agents

Read the docs

```
$ npm install @vercel/connect
```

Connect apps and agents to 1,000+ services through managed OAuth, MCP, and API key connections.

01

Install the skill

```
$ npx skills add vercel/vercel-plugin --skill vercel-conne
```

02

Connect to Figma

Via CLI | Vercel Dashboard ↗

```
$ vercel connect create figma --name acme-figma
```

03

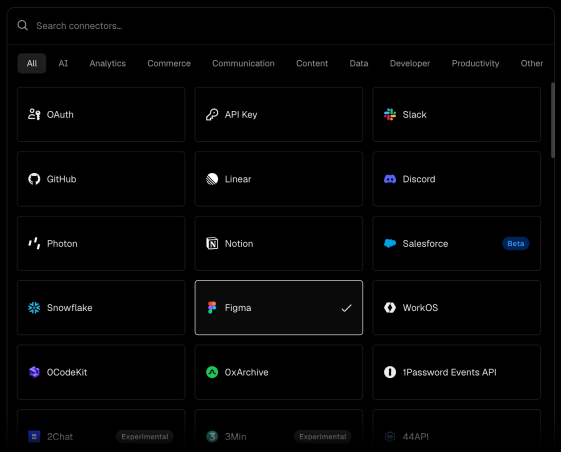

Use its data in agents and apps

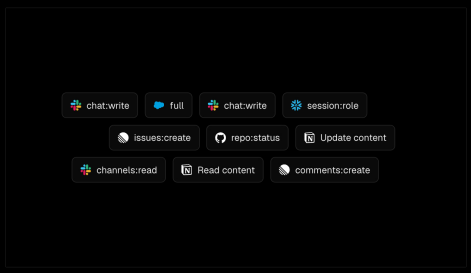

```
import { getToken } from '@vercel/connect';

const userId = 'user_123';

const token = await getToken('figma/acme-figma', {
  subject: { type: 'user', id: userId },
});
```

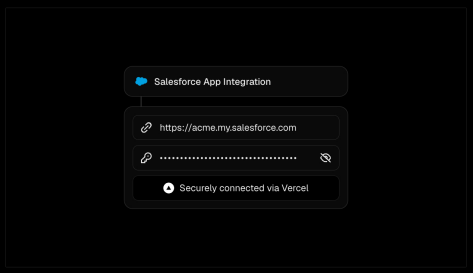

Copy Prompt | Read the docs

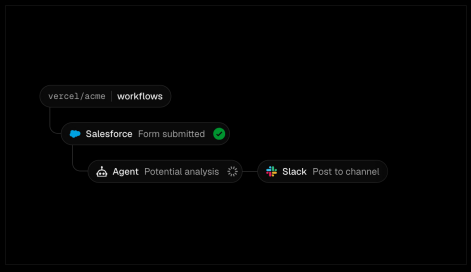

Secure credentials for agent workflows

Use short-lived, scoped tokens instead of long-lived secrets. Keep access controlled across projects and environments.

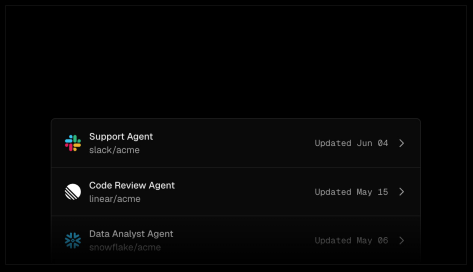

Request credentials at runtime

Create and manage connectors from Vercel, then request credentials when your app or agent needs them.

Built for agents that take action

Connect agents to services like Slack, GitHub, and Notion so they can read context and trigger workflows.

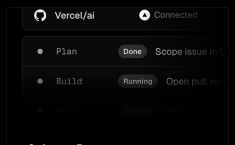

Centralized connection management

Manage all third-party connections in one place across your team, projects, and environments.

Get started

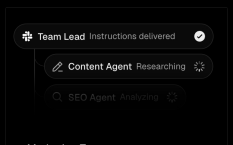

See Vercel Connect in action with one of our templates.

Read the docs

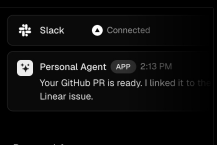

Software Factory

Ship a software factory that puts AI agents on every stage of the development loop.

Marketing Team

Deploy an entire marketing team of agents orchestrated from Slack for social, SEO, email, and more.

Personal Agent

A personal agent that works with you day-to-day in Slack, GitHub, and Linear.

Frequently asked questions

01 What is Vercel Connect?

Vercel Connect lets your agents and services access external systems on behalf of your users and teams. Instead of storing provider credentials in long-lived environment variables, you request user-authorized tokens at runtime with project-level access controls.

02 What problem does Vercel Connect solve?

03 How does Vercel Connect work?

04 Which connectors are available?

05 When should I use Vercel Connect instead of Integrations?

06 How does pricing work?

07 Does Vercel Connect support webhook triggers?

08 Does Vercel Connect support Chat SDK?
