

Security that scales with you.

Purpose-built for secure development, Vercel allows you to build, deploy, and protect applications with our suite of security features.

Get a Demo

Vercel Firewall
Resilient edge protection

Web Application Firewall
Secure application traffic

Workspace Security
Trusted access management

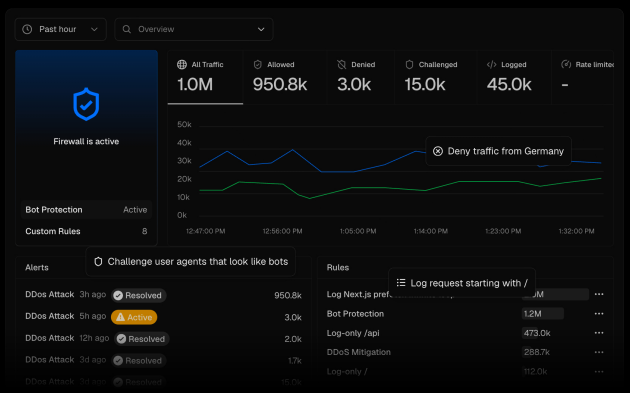

Trusted by security teams.

WIZ Abnormal snyk LAURENTIAN BANK TRUESEC

Automatic protections. Free for all users.

The Vercel Firewall provides system-wide protections to secure your apps at scale.

Read the Vercel Firewall docs | Visit your firewall

Global protection

Edge-localized protection. L3/L4 protection at every edge location. Your site stays protected without adding latency.

DDoS mitigation

Automatic DDoS Mitigation for all plans. Embedded bot management and protection against traffic abuse.

Challenge Mode

Protect your site when under attack. Prevent malicious traffic by showing a verification challenge for visitors in real-time.

The invisible bot detection engine.

BotID is fast, reliable, and built for both your users and developers. No CAPTCHAs, API keys, or fine-tuning required.

app/api/signup/route.ts

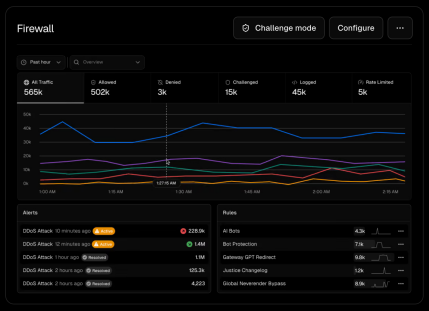

```ts
import { checkBotId } from 'botid/server';

export async function POST(req: Request) {
  const { isBot } = await checkBotId();
  if (isBot) {
    return new Response("Access Denied", { status: 403 });
  }
  return new Response("Success!", { status: 200 });
}
```

Customized application security. Instantly deployed at scale.

Vercel's **Web Application Firewall** allows customers to create custom rules to log, block, challenge, or rate limit L7 traffic.

Learn more | Add WAF rules now

Observability
Utilize our observability dashboard to make informed security decisions.

Managed Rulesets
Activate Vercel's managed rulesets to protect against top priority risks, including OWASP Top 10.

Custom WAF Rules
Create and enforce rules unique to your business with IP blocking, rate limiting, and more.

Right access. Right roles.

Protect deployments and workspaces with workspace security controls.

Read about secure team access

Role-based Access Control
Assign roles to give team members the permissions they need to work on your projects.

Deployment Protection
Secure your Vercel project's preview and production URLs with fine-grained access control.

Audit Logs Enterprise
Track and analyze your team members' activity. Accessed by team members with the owner role.

Directory Sync Enterprise
Manage your organization's memberships by integrating with third-party identity providers.

ISO 27001 | SOC 2 | PCI DSS | HIPAA | GDPR | DPF

Frequently asked questions.

- Does Vercel offer DDoS protection?
- Is Vercel SOC 2 Type 2 compliant?
- Is Vercel GDPR compliant?
- Is Vercel ISO 27001 certified?
- Is Vercel TISAX Compliant?
- Is Vercel certified under the Data Privacy Framework (DPF)?
- Does Vercel support HIPAA compliance?
- Does Vercel support PCI compliance?
- Can I protect my deployments?
- Does Vercel encrypt data?
- Does Vercel backup the data on its platform?
- What infrastructure does Vercel use?
- Does Vercel provide infrastructure segregation?
- Does Vercel conduct regular penetration testing and vulnerability scans?
- Does Vercel use subprocessors?
- Does Vercel have a bug bounty program?
- Does Vercel protect against OWASP Top 10?
